

DRAGON BRIGHT I

Step I

Aluminum Cleaner / Brightener

Concentrated hydrofluoric acid-based aluminum cleaner and brightener for a natural color.

Dragon Bright I is the first step in a 2-step fleet and machine-washing process. It is intended to be used with **Dragon Clean II**. **Dragon Bright I** helps prep the exterior surface for road gunk, dirt build up and soot removal. There is no brushing required. **Dragon Bright I** can be applied through X-Jetting, up-streaming or down-streaming.

Mixing Instructions:

For aluminum brightening; mix 5 gallons into 50 gallons of water. Further dilution of the product will be required. The amount of dilution will vary depending on road gunk, dirt build up, soot and surface conditions.

For 2-step; dilute 2.5 gallons in 50 gallons of water.

! CAUTION

DO NOT use on polished or brushed aluminum surfaces. If used on painted surface, be sure to test in an unnoticeable location. Store in cool dry place. Keep container tightly sealed. Be sure to always wear proper protective equipment.
