

## THE WORLD'S ONLY DUAL WET & DRY ICE BLASTING MACHINE

Coulson Ice Blast launched the IceStorm45, an innovative portable dual wet and dry ice blasting machine. The IceStorm45 utilizes 10% of the water that would be used for pressure washing, while using no environmentally harmful abrasives. The IceStorm45 technology can be fully automated, creating a seamless customizable robotics cleaning system as a result of our partnership with one of the leading robotics companies in the world.

## BENEFITS OF DUAL WET ICE & DRY ICE BLASTING

- Non-toxic media
- Non-abrasive
- Non-flammable
- Non-destructive to the surface being blasted

- Environmentally responsible
- Uses 90% less water than traditional power washing machines
- Food industry safe
- Approved by the USDA, EPA, & FDA

### Wet Ice Specific Benefits

- Significantly reduces your operating costs
- Under proper storage, wet ice can virtually last forever
- Reduces airborne contaminate levels compared to other blasting technologies
- Non-hazardous material unlike other blasting medias

### Dry Ice Specific Benefits

- Less secondary waste
- Health & safety friendly
- Less time, labour & resources
- More effective and efficient
